

WHAT TO EXPECT DURING REMEDY CONSTRUCTION 8

National Grid regularly completes work similar to what is outlined in the Remedial Action Work Plan (RAWP) for the Tidewater Site. These images from other similar projects show the type of activities the community can expect to see during construction of the remedy.

SEDIMENT & EROSION CONTROL

Silt Fencing with Hay Bales Limits Erosion

Turbidity Curtain Prevents Sediments From Migrating Away From Site

DUST & ODOR CONTROL

Water Trucks Control Dust

Covered Stockpiles Control Dust and Odors

Foam Addresses Any Odors

OFFSITE TRACKING CONTROL

Tracking Pad Prevents Offsite Tracking of Material
