

Summary of Community Outreach Event

Former Tidewater Facility
Pawtucket, Rhode Island

August 3, 2018

GZA Job No. 05.0043654.00

This document has been prepared to summarize the Community Outreach Event held by National Grid on July 17, 2018 between 6PM and 8PM at the Blackstone Academy Charter School. Consistent with the Public Involvement Plan (PIP) established for the Tidewater Site, National Grid held this Community Outreach Event to provide additional information regarding the remedy for the Site (including the June 2018 Remedial Action Work Plan (RAWP) submitted to RIDEM), RIDEM's Site Remediation Program, and to further engage in dialogue with the community about the Site. The City of Pawtucket also participated in this event and displayed their conceptual future use plan for the northern portion of the Site and their adjacent Town Landing property. This event was a poster board session which allowed for dialogue with community members on past and upcoming project work.

No verbal or written comments were received at the event.

Attached is the sign in sheet from this Community Outreach Event.
